

Did you know.....

Total agriculture production (food, fiber & energy) accounts for less than 9% of total all-source U.S. greenhouse gas (GHG) emissions. Dairy and meat production -- combined -- account for less than half of this amount at 3.9% of total U.S. GHG emissions. Dairy accounts for 2% of total U.S. GHG emissions. (Source: EPA 2017 data released Feb. 2019)
